MAJOR and CAREER EXPLORATION EXPO

Wednesday, October 26, 2016
10 a.m.–2 p.m.
Millett Atrium

- Tables with faculty from each major
- 24 Community partners, businesses -- internships and career options
- 16 alumni – discuss career options
- 316 student participants
Connect with talented liberal arts students and attract the employees you need.

Employers rank leadership, teamwork, problem solving, and communication skills as the top attributes they want when they hire new college graduates.

Wright State’s liberal arts students offer a strong foundation in critical thinking, analytical and research abilities, written and oral communication, and the ability to adapt to an ever-changing economy.

Our staff can partner with your organization to develop rewarding recruiting relationships to find the talent you need.

We can assist with:

• Internship opportunities, customized direct recruiting, and interview sessions
• Spotlighting your organization at networking events, student clubs, information tables, class presentations, and our Student Success Series
• Special student projects that achieve your goals
• Connections with faculty experts
• Free job and internship postings

Contact us: (937) 775-4268 or liberal-arts.wright.edu/careers-and-internships

Learn more about matching funds, up to 50 percent, for new internship positions through our GMIC partnership.
Overview

Pros

• Engage Students in their future
• Educate about the value of the Liberal Arts
• Increased engagement with alumni
• Increased engagement with community partners
• 4.2% increase in retention after first year
• 45% increase in student internships

Challenges

• All Internal
• Administration – centralized structure
• Budget cuts, decreasing positions
Passport to Success

A Partnership between the College of Arts and Sciences and the Career and Community Engagement Center (CCEC) At Shippensburg University

James H. Mike, Dean of the College of Arts and Sciences
The Issue

• Professional programs – strong association between the degree/credential name and career pathway or job.

• A&S programs – do not have this (or sometimes any) similar association. Faculty members focus on content delivery and most often have work experience only in the academy.

• Programs associated strongly with employment often have external experiences such as an internship, shadowing, consultation, applied research, and so forth.

• Colleges of Arts and Sciences, seemingly in areas related to the humanities, but in reality across all areas, have not paid particular attention to the desire to align jobs.

• Even in those areas in Arts and Sciences having stronger association with post-graduation employment, the range of opportunities expands beyond common perceptions.
Aligning Expectations

• Students/Parents
  • Most seem to expect that they’re attending college to receive a credential or (set of credentials) that will allow them to get a job/have a career.
  • Some/many seem to struggle with aligning liberal education with this goal.

• Faculty/University
  • Content delivery focus – expect that students understand and engage in the content aspects of learning and do it for the sake of learning.
  • Liberal educational approaches are valued inherently and there is considerable focus on students progressing to graduate and professional schools.
  • Some focus on workforce preparation.

• Employers
  • Expect students to come pre-trained and ready for the workplace.
  • Understand and state the need for values espoused by liberal education, but many are looking for skills and specific degree titles and/or credentials.
Missing Links

• The focus of the program is on developing career-related skills through non-credit offerings. It hopes to help students answer questions, such as:
  • “How do I pick a major and then use it to make my way through life?”
  • “How do I understand and effectively use what has been gained in my education?”
  • “How do I communicate effectively?”
  • “How do I use what has been learned?”
  • “What is lifelong learning and why do I need it?”
  • “What good is my degree and what can I do with it?”
  • “How do I interact appropriately with others?”
  • “How do I write a resume and cover letter?”
  • “How do I dress and act during an interview?”
  • “How do I develop networks and utilize them in gainful ways.”
  • “How do I create connections within my professional sphere?”
Passport to Success

- The program was developed collaboratively with our Career and Community Engagement Center (CCEC) and Ms. Victoria Kerr, our Director of the CCEC.
- We have been doing the program for 2 years and it involves targeting students in their last two years and collaboratively working with designated faculty members in departments delivering capstone courses or experiences.
- Currently looking to expand the reach into the first and second years, too.
2015-2016 College of Arts & Sciences/CCEC Passport to Success

• Open to all College of Arts & Sciences students.

• Career Passport to Success Program helps students take a first step on the ladder to professional achievement.

• Students gain a greater understanding of themselves and their career development process.

• Students can be better prepared to choose/confirm a major, research careers, and develop effective job search strategies and interview skills.

• A way to document the program on the resume, providing an extra opportunity to impress prospective employers/graduate schools with an example of motivation and drive.

• At year’s end, students who complete all requirements receive a Certificate of Program Completion.
2015-2016 College of Arts & Sciences/CCEC Passport to Success

• How does it work?
  • Stop by the Career and Community Engagement Center to pick up a CCEC Passport to Success.
  • Register to attend the events to get your “passport” stamped. RSVP via SHIP Career Connection.
  • Attend at least 1 event/program under each category to receive your “Certificate of Completion,” a chance to attend the Etiquette Dinner, as well as win a $100 VISA gift card.
  • For questions, students contact the Career and Community Engagement Center.
Areas of Emphasis

• **Discover** – exploration of majors and initial examination of aspects related to career planning.

• **Define** – exploration and workshops related to preparing to represent the major.

• **Distinguish** – development of tools and communication strategies for appropriate representation of both the degree and the student in the workforce.

• **Reward** – an “Etiquette Dinner” meant as a reward, but also to develop and build networking and social skills.
Next Steps

• Continue to work collaboratively with departments and individual faculty.

• Hold the Etiquette Dinner each semester rather than annually, working where possible to appropriately align with capstone experiences.

• Expand the program to differentiate years – different programming for first-year through senior year.

• Integration into introductory courses/experiences.
